

Subway® Toast Launch of New Merrychef eikon™ Series

A typical Subway® menu offers an incredible range of sandwich combinations and Merrychef's speed ovens are used to toast hot sandwiches like the popular Subway Melt®. The new eikon™ e4 has already proved a big hit with Subway®. Director of European Operations, Andrew McCulloch, said:

"Merrychef's touchscreen, pictorial menu is great, the images are aligned with food images on our tills, it's easy to update and the transition is seamless."

"The e4 helps us achieve our customer pledge to deliver sandwiches within two and a half minutes from order, whatever time of day."
