

Merrychef Toasts Subway® Success

The winning Subway® formula is based on fresh sandwiches, prepared in front of the customer and available to go within two minutes.

A typical Subway® menu offers an incredible number of sandwich combinations. The Merrychef 402S is used to toast hot sandwiches like the popular Subway Melt® in just 20 seconds.

Andrew McCulloch, Subway® Director of Operations UK & Europe says:

"Merrychef work with the Subway® product development team to ensure the brand gets the best out of the user friendly 402S. Merrychef has the capability to introduce and support accelerated cooking technology around the globe, which is the exciting bit for us.

"As the backbone to our hot sandwich offer, the 402S is in constant use in store and we are delighted with the fantastic sandwiches it produces around the clock".

"The professional support Merrychef bring to our team, from commissioning ovens on site to the excellent service guarantee gives us total confidence. Simple to use, the 402S is key to a smooth running fast-service operation".
