

Merrychef to unveil new **eikon™** series at Caffe Culture

MERRYCHEF Ltd, a Manitowoc Foodservice company, will launch its latest, award-winning* innovation, the energy saving eikon™ series of speed cooking ovens, at **CAFFE CULTURE STAND D66**

Incorporating advanced easyToUCH™ technology the eikon™ series guarantees unbeatable ease of use via an icon driven screen and MenuConnect™ software. Tests show the new series will save foodservice operators 25%* in energy consumption.

The easyToUCH™ technology ensures operators are never more than two steps away from a cooking programme, available in multiple languages, while MenuConnect™ enables instant menu management and ethernet updates via a standard USB key.

In addition to greater ease of use and energy efficiency, the streamlined designed eikon™ series incorporates a monitored, removable front filter for ease of cleaning, ventless facility (no investment in ventilation hood) and cool-to-touch skin.

The eikon™ series incorporates the e3; e4 and e5 models. The e3 will replace existing ovens EC401 and EC403, the e4 replaces the current 402S model while the e5 supercedes the EC501.
